

# National Aquarium

---

For more than 10 years, Dave Huber had built projects like the Amazon River Rain Forest Exhibit for the National Aquarium. When Kaliber Construction, Inc. was established, one of its first clients was the National Aquarium.

We value long-term relationships and thrive on repeat business. Leaders at the National Aquarium knew they could depend on Kaliber Construction, Inc. as their General Contractor. We understood how to complete construction where sensitivity for, and accommodation of, both animals and visitors were paramount. This resourceful mindset, which ensured quality and safety for both people and animals, is demonstrated throughout the work of Kaliber Construction, Inc.
